

Dry-ink DIRECT HEAT IMPRINTER

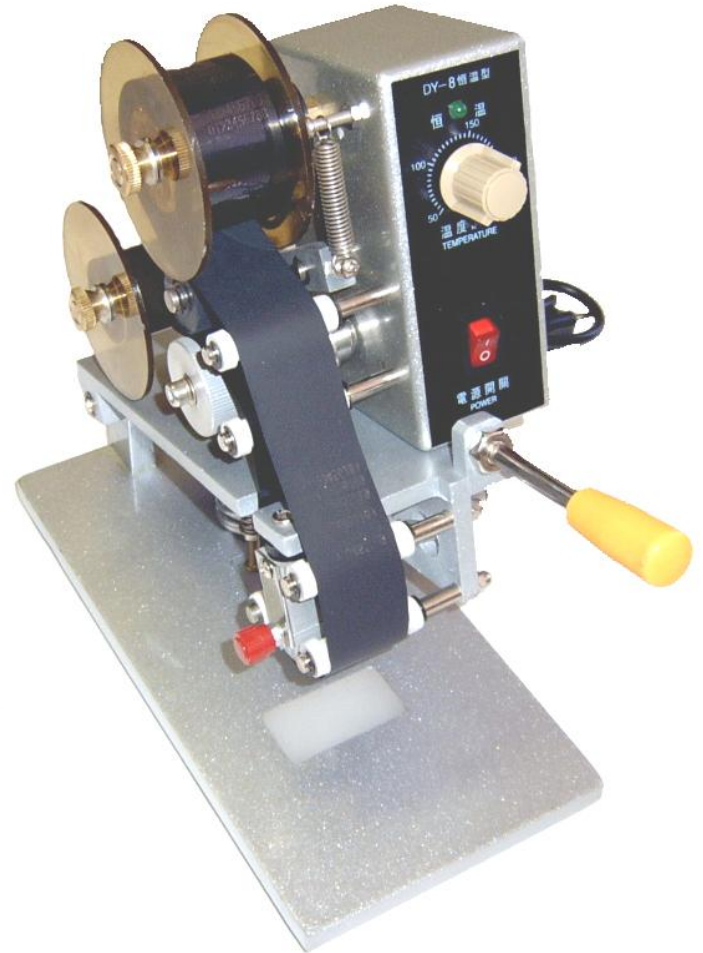

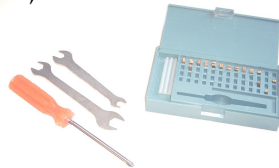

DY-8

The hot stamp imprinter, **DY-8**, is used to print expiration dates, manufacturers' codes, lot numbers, or other information onto poly bags, poly cases, paper bags, aluminum, or other materials. This imprinter is easy to use and provides a clearly printed stamp on your material. The unit is equipped with an adjustable thermostat to control the printing temperature. The print dries as soon as it is printed. The characters are easy to change.

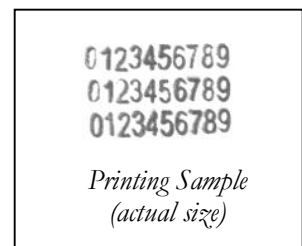

This unit is a tabletop model equipped with a hand activation bar on the right side of the unit. The unit is capable of 1-3 lines of print and each line can hold 12 characters of type. The working temperature is 300°-390°F (150°-200°C).

Imprinter Includes:

- 1 roll of ribbon (30mm x 110yds.)
- 3 pieces each of numbers 0-9
- 1 piece each of "LOT", "EXP", & "MFG"
- 5.5-7mm open spanner
- 8-10mm open spanner
- cross-line screwdriver

Additional alphabet typesets (A-Z), individual letters, number typesets (0-9), and ribbons are available for purchase. Letters and numbers are 3.5mm in height and 2.5mm in width. Ribbon colors are available in black, red, blue, white, gold, and gray.
