

Long HAND SEALERS

FS-600 FS-800 FS-1000

FS Impulse Hand Sealer Series offer a longer sealing length for wider sealing applications. Sealers are gray in color, and are available in 23.6", 31.5" or 39.4" with a 2.8mm seal width. The sealers are portable and made of aluminum construction. No warm-up time is needed, and the sealers are very easy to operate. They are also equipped with an electronic timer which controls the sealing time needed for the varying thickness of the different materials. Once the timer is set, it will give a consistently flat seal. It is recommended that the user hold the seal down for a few seconds more after the light goes out to ensure enough time for the seal to cool and set. Manufacturer's replacement kit includes 2 elements and 1 Teflon cover.

Operation: Set the timer, insert the bag between the sealing bar and the sealing platform, press down the seal bar, and release bar after the timer goes out.

Round wire heating elements are available for **cut** and **seal** applications. There is no additional charge for the round cut wire. When ordering, add the letters **rnd** to the model number (example: 23.6" hand sealer with round cut wire: FS-600rnd).

Specifications

	FS-600	FS-800	FS-1000
