

World Leader in Sophisticated Packaging Systems**MBF20T** Manual Tilting Packing Station & Bottom Flap Folder**series overview**

The BestPack® MBF bottom flap folder/packing station with rotating/tilting bed closes the bottom flaps and holds the carton in position while the operator fills the carton. The operator then activates a switch that tilts the station back to a flat position. Finally, the operator then pushes the carton to the next station.

The ergonomic design of the tilting bed provides more leverage in packing the cartons.

A great addition when placed in front of one of our flagship carton sealers.

major features

- *Stand-alone units*
- *Adjustable Bed Height from 24.5" to 30.0"*
