

# *Impulse* HAND SEALER

PFS-200B

*Impulse hand sealers seal poly bags and any thermoplastic materials quickly and efficiently without having to wait for a warm-up. They are equipped with a plug-in electronic timer. The timer controls the sealing time needed for different materials' thickness and will automatically beep when seal is done. Once the timer is set, it will give a consistently flat seal. It is recommended that the user hold the seal bar down for a few seconds more after the light goes out to ensure enough time for the seal to cool and set.*

PFS-200B is an 8" hand sealer with a 10mm wide flat element with an embossing code function or meshed seal. The coding function is located on the silicone rubber (see picture below). The manufacturer's replacement kit includes 1 element, 2 Teflon covers, and 1 number set for coding.

The machine will seal material up to 8" wide and 20 mil or more in total thickness. The seal width is 10mm (3/8").

## *Specifications*

Power Supply	100V
Power (watts)	1000
Weight (lbs.)	14
Sealing Length (in.)	8
Sealing Width (mm)	10
Max Thickness (mil)	20
